Another wonderful Ebi-Hime yuri game. It's getting to be a habit :) This one is about food. Well, not really, but kind of. No, it's about a little demon girl from hell threatening to reap your soul if you don't feed her. So, you feed her, or this is one short game, lemme tell ya. -Of course, the demon turns out to be quite lovely and enchanting (as long as you feed her!). It's a lovely journey through some of Japan's most well-known dishes, along with images and descriptions thereof (yes, you will raid your cupboards, pantries and fridges more than once during this game). And it's quite a long game too, at least if you want to explore all the roads and avenues our main characters can travel. Lovely game, long game, highly recommended, and now I'm hungry again. One of the first Logistical puzzle/transport games I completed. Very much enjoyed it! Somehow the graphics don't seem to matter once you get going on it. Mostly quite easy, but some cities take some thought.. Like most indie multiplayer only games, online is dead.. Good fun top down Sci-Fi Action game.. Unimpressive. While the general idea is nice, the gameplay is very repetitive with various items found hardly making a difference. There isn't a big goal to achieve (like in, say FTL), just score to get for amassing generic artefacts or items (I appreciate the descriptions, but all alien species are the same, just with different picture). For me, it's a disappointment not worth the money.. How do i do the lewd? In all seriousness get a game pad or a stick and fix the buttons to a format that you know and comfortable with. i use the blazblue/arcana heart set up its very pretty music is jammin' How do i combo? and how do I do lewd finishers?

Mind blown!

What an experience. I loved it :D. Just to support the devs.. This game does not support inverted mouse controls so made it unplayable for me. To leave out such a fundamental standard control option is an oversight.. AT A GLANCE

Nah Bad!

IN DEPTH

A fairly slick tribute to the 1986 era of NES games all the way to it's simple 64-color design scheme and basic gameplay. Unfortunately, not expecially deep. It gets a tentative reccommendation as I would routinely spend \$5 to rent a game like this back when I was in Dinosaur School and would not have regretted playing this.

It's super short too.

If you played these games as kid like I did, expect it to last one afternoon tops.

Other than that, this is a solid "Our First Video Game" and I hope they make more.

The biggest problem is the unreliable jumping physics. There are plenty of places (the dropping platforms in particular) where you will die simply because the game never registered the landing. This is what "80s hard" really means: the crude programming meant a lot of cheap deaths. Fortunately, the game eschews checkpoints in favor of unlimited lives. ★☆☆. Like a good challanging zombies game? this is the game for y'all.. The game cost me \u20ac0.25 with a 75% off coupon. You get 3 trading cards from the game worth (very surprisingly) \u20ac0.08 each, so that means the trading cards are worth \u20ac0.24. Therefore the game only cost me 1 single cent (penny)... and yet I still feel ripped off.. I used to have this game on a disk years ago but I lost it and I spent years trying to remember what the game is. Now I have found it. This game is very hard and the story is very confusing. I've still not got passed the first level. The controls are very annoying since it only uses your mouse, but if you want a very weird game from the 90's and you have the time and patience to play it. I reccommend it.. Stay the way exactly you are Japan, this is why we love you.

Not everyone in other countries is a crazy snowflake or a puritan and wants you to remove content from your games and do not listen to those people or sony.

Thank you for keeping Intimacy mode that Sony removed from its version because they decided that lewding pretty anime girls is not okay anymore, but massacring people is great fun and all!

There is nothing wrong with killing people in a game or lewding anime girls because **SURPRISE ITS FICTION**

If you liked previous Senran Kagura games you'll like this one it looks even better than before

If you like lewding pretty anime girls this game is for you too there is a bunch of costumes that you can dress them up too.

Just be careful and stay away from Katsuragi because she will grope your♥♥♥♥♥♥♥♥

The only problem that I have is the fact that the text keeps running and you can't stop it in the non 3D parts which is just very annoying.. Team Fortress 2 is free.

Freebie isn't.. Just finished my playthrough. Worth every penny.
